INTERNATIONAL
SYMPOSIUM

28-29.06.2024

Meliá Castilla Convention Center
Madrid - Spain

WELCOME

The **20th edition** of the Sweden & Martina **International Symposium** will take place on 28th and 29th June in the Meliá Castilla Convention Center, Madrid. A unique opportunity to **celebrate Prama**, the one and only intramucosal implant, which in the last **ten years** has literally revolutionized the approach to implant prosthodontics.

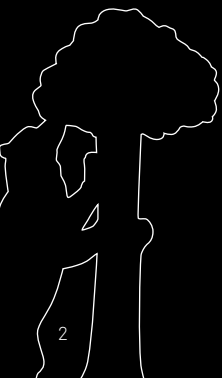

Prama, thanks to its conformation with converging neck, leaves more space for soft tissues and allows freedom of positioning according to the clinical needs, characteristics which, combined with the unique surface of the implant neck, allow aesthetic and functional results stable over time in both soft tissue and bone levels.

Prestigious speakers from all over Europe will take the stage of the Meliá Castilla Convention Center sharing experiences, testimonies and suggestions, with the common denominator of an increasingly digital approach.

The scientific program of the International Symposium includes sessions for clinicians, dental technicians and hygienists: the congress therefore presents a **multidisciplinary focus** which involves all the professional figures active in daily practice of the dental clinic.

The Symposium Gala Dinner, which will be held in the Plaza de Toros de Las Ventas will be a unique moment of celebration, in one of the most evocative settings in the world.

See you in Madrid, to share this unmissable journey through clinics and science!
