

Guided Surgery & Immediate loading

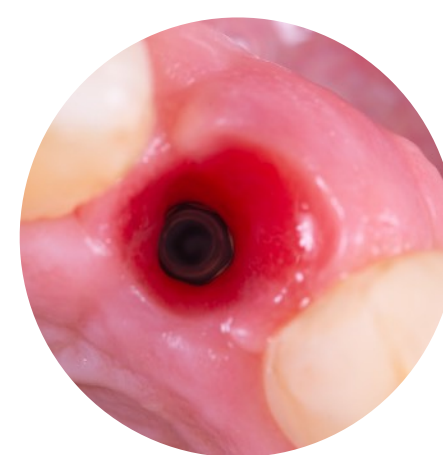

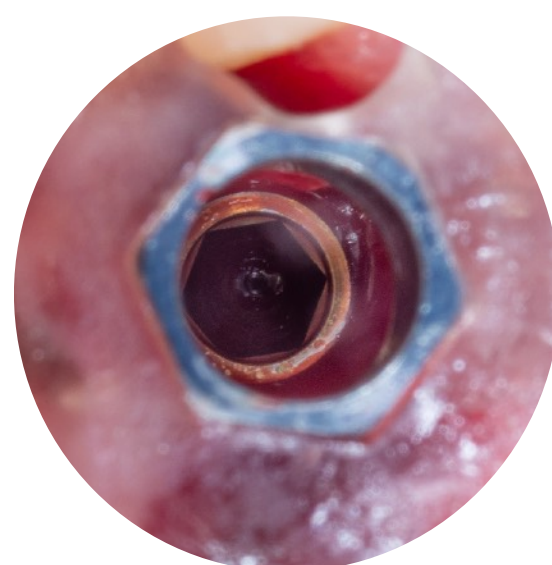

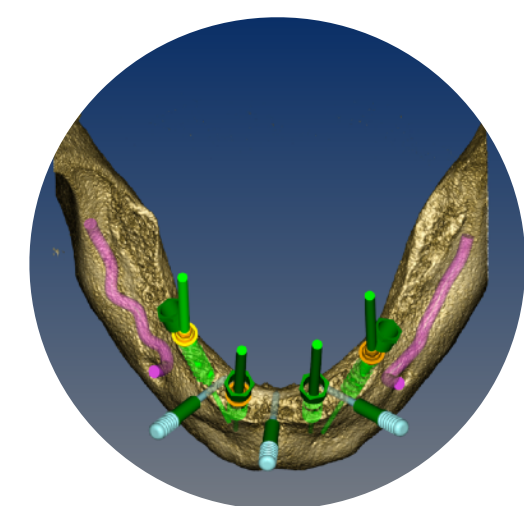

1 Day course

From planning to restoration. A step-by-step Guide with a hands-on approach for successful guided placements and predictable restorations.

Course content

- The full sequence of implant planning: from the initial consultation and record gathering, through the surgical process, to immediate loading. This is achieved by blending theoretical concepts, literature reviews, and extensive case presentations.
- Hands-on technique to emphasize practical skills in digital planning, guide design, implant placement, and immediate loading techniques.

This comprehensive approach provides a detailed and practical understanding of the entire guided implant placement and loading process.

Limited to 14 participants

7h CPD
